Self-Paced Polling – Student Experience

Your instructor may use clickers for quizzes. Before you go to class on the quiz/exam day, check the battery level on your clicker, making sure you have at least 50% of battery. Below are the screens your clicker will display as you start and complete the quiz.

ResponseCard NXT

1. Push any button on your clicker and you will see a Welcome window and then an battery icon showing if you have enough battery for the test. Then the test information displays on the screen. If the test has different versions, you will be prompted to enter the version number first. Press OK to enter the test.

2. You will be taken to the 1st question. Push in the answer choice. The circle will be filled after you enter the answer. Use navigation arrow to continue to the next question.

3. When you finish entering all the answers, you will see the message Complete! and then a screen allowing you to either Go Back to check/change the answers or End the test. (See step 3-a and 3-b below.)

a. If you choose to go back and check/change the answers in Step 3, or if you push the Back button by accident, you may find yourself stuck with no buttons to push and submit the test. In this case, push the Go To button, and then push Blank on the next screen. This will take you back to the previous screen shown in Step 3.
b. If you choose to end the test in **Step 3**, press **OK** and you will then be taken to the confirmation screen. Press **OK** to submit the test.

4. You will then see the following messages (see below), indicating their answers have been submitted and received. When you see the message saying “Goodbye” (the default message), your test has been successfully submitted and received.

**QT Device**

1. Push any key on your QT device and you will see a **Welcome** window and then an battery icon showing if you have enough battery for the test. Then the test information displays on the screen. If the test has different versions, you will be prompted to enter the version number first. Press **OK** to enter the test.

2. You will be taken to the 1**st** question. Enter the answer choice using the keys right below the answer choices listed on the screen. The circle will be filled after you enter the answer. Use navigation arrow to continue to the next question.

3. When you finish entering all the answers, you will see the message **Complete!** and have the option to either go **Go Back** to check/change the answers or **Send the test**.

   a. If you choose to go back and check/change the answers, push the **Back** button and you will be taken to the **Test Tools** screen shown below, where you can find a specific question to check, or access other tools. After you finish checking/making the changes, use the **Tools** button to go back to the **Test Tools** screen, then select **Exit Test** option, and then push **OK** (see below). You will return to the **Complete!** screen (see above) again.
4. If you choose to end the test in **Step 3**, or are taken back to the **Complete**! screen after making some changes, press the button under the mail icon and you will be taken to the confirmation screen. Press **OK** to submit the test.

5. You will then see the following messages (see below), indicating their answers have been submitted and received. When you see the message saying “Goodbye” (the default message), your test has been successfully submitted and received.
